Assignment 4 Illustrated Postcard: Step-by-Step Guide

> This guide is an execution plan. It does not complete or submit the assignment. Review your own work before you upload it.

Classroom record

Item	Exact Classroom information
Course	BDES -107- Imaging 1
Section	EBay | FYS | Fall 26 | Vaibhav Panchal
Exact visible title	Assignment - 4 - Illustrated postcard
Teacher	Vaibhav H Panchal
Task/part label	EA1 - Part 1 -
Status / submission state	Assigned; “Mark as done” is available; no submitted file is shown
Due	Not shown
Points available	100 points
Earned grade	Not shown
Posted/assigned date	Sep 23 (Edited Sep 23)
Topic	Not shown
Class comments	Not shown
Private comments	Not shown
Task attachment or linked resource	Not shown
Submitted file	Not shown
Assignment link	Open the exact Google Classroom assignment

Required by Classroom

- ☐ Create an illustrated postcard.
- ☐ Use a combination of analog and digital tools.
- ☐ Work in the style of one art movement explored in class.
- ☐ If you use type-based elements, select a font that reflects that movement.
- ☐ Choose from the listed movements: Greco-Roman, Renaissance, Gothic, Baroque, Rococco, Neo-classicism, Romanticism, Realism, or Impressionism.
- ☐ Submit a PDF.
- ☐ Document both the process and the final outcome in the PDF.
- ☐ Use the stated nomenclature: EA1A_Student Name_Section_Fall2026.

Grading criteria shown in Classroom

- Content, Communication and Tools
- Independent exploration/ engagement with content
- Documentation- (structure, process, citation, references)
- Concept and Narrative Development

Course-outcome mapping shown in Classroom

- CO1 - Show strength in knowledge of design elements and principles.
- CO2 - Explain the role, functionality & areas of application of software.
- CO3 - Demonstrate fluency in using digital design tools through a design thinking process across software typologies within 2D & 3D processes.
- CO4 - Showcase the ability to understand a brief and design an appropriate solution.
- CO5 - Show fluency in digital imaging nomenclature, process and cross platform working.

> Classroom also shows the text “Sample Assignment / Sample answer scripts,” but no task attachment or linked resource is shown in the record.

Preparation and materials

Required by Classroom

- ☐ Have analog and digital tools available; the work must combine both.
- ☐ Select one movement from the Classroom list.
- ☐ Be ready to document the process and final outcome in a PDF.

Suggested preparation

> The planning fields and preparation actions below are suggestions. Classroom does not specify the postcard’s dimensions, software, visual content, or PDF page count.

- ☐ Plan how to capture useful process stages.
- ☐ Keep citation and reference information for material used.
- My art movement: _____
- My postcard content or subject: _____
- My concept or narrative: _____
- My analog tool or tools: _____
- My digital tool or tools: _____
- My type-based elements, if any: _____
- My font, if any: _____
- Why that font reflects the movement: _____
- My sources or references: _____

Suggested workflow

> Everything in this section is a suggestion for organizing the work. Classroom does not specify these stages.

1. Interpret the brief

- ☐ Reread the Required by Classroom section.
- ☐ Write the chosen movement in the blank above.
- ☐ Note visual features of that movement that you may explore.
- ☐ Write a short concept or narrative in your own words.
- ☐ Decide what the postcard will communicate.

2. Research and cite

- ☐ Collect references that help you understand the chosen movement.
- ☐ Record enough source information to cite each reference.
- ☐ Separate references from your original work.
- ☐ Decide which references will appear in the process documentation.

3. Explore independently

- ☐ Make multiple rough ideas or studies.
- ☐ Test how design elements and principles can support the chosen movement.
- ☐ Compare the ideas for content, communication, concept, and narrative.
- ☐ Choose one direction to develop.

4. Make the analog work

- ☐ Use the selected analog tool or tools.
- ☐ Record useful stages of the analog process.
- ☐ Preserve evidence that shows your own exploration and decisions.
- ☐ Prepare the analog material for the digital stage.

5. Develop the work digitally

- ☐ Bring the analog material into the selected digital tool or tools.
- ☐ Develop the composition while keeping the chosen movement visible in the design approach.
- ☐ If the work includes type-based elements, check that the font reflects the movement.
- ☐ Record important digital stages, tools, and decisions.
- ☐ Check that the final result answers the illustrated-postcard brief.

6. Build the process PDF

- ☐ Arrange the documentation in a clear structure.
- ☐ Show the process, including the combination of analog and digital tools.
- ☐ Show the final outcome clearly.
- ☐ Include citations and references.
- ☐ Use accurate digital imaging nomenclature when describing tools and processes.
- ☐ Check that the document communicates how the concept or narrative developed.

7. Export and name the file

- ☐ Export the documentation and final outcome as a PDF.
- ☐ Follow the nomenclature written in Classroom: EA1A_Student Name_Section_Fall2026.
- ☐ Replace “Student Name” and “Section” with your own information.

• My exact final filename: _____

> The Classroom text wraps the nomenclature across two lines and does not explicitly show whether spaces should remain or whether “.pdf” is part of the nomenclature. Confirm the exact filename formatting with the teacher or the Classroom interface before uploading. The submitted file itself must be a PDF.

Quality checks tied to the grading criteria

Visible grading criterion	Check before submission
Content, Communication and Tools	The postcard content is understandable; the work communicates its intent; analog and digital tools are both evident.
Independent exploration/ engagement with content	The documented process shows the student’s own exploration, choices, and development.
Documentation- (structure, process, citation, references)	The PDF has a clear structure, shows process and final outcome, and includes citations and references.
Concept and Narrative Development	The PDF makes the concept or narrative and its development understandable.

Additional checks tied to the brief and mapping

- ☐ The design uses one movement from the provided list.
- ☐ Any font used for type-based elements reflects that movement.

- ☐ The work shows attention to design elements and principles.
- ☐ The process identifies the role and use of the digital software.
- ☐ The documentation shows use of digital design tools and a design-thinking process.
- ☐ The final outcome is an appropriate response to the brief.
- ☐ The process uses clear digital imaging nomenclature and shows analog-to-digital or cross-platform working where applicable.

Final pre-submission checklist

- ☐ I created an illustrated postcard rather than only process notes.
- ☐ I combined analog and digital tools.
- ☐ I used one listed art movement.
- ☐ Any font used for type-based elements reflects the movement.
- ☐ My PDF documents the process and final outcome.
- ☐ My PDF includes the necessary citations and references.
- ☐ I checked the work against all four visible grading criteria.
- ☐ I checked the exported PDF opens and displays the intended content.
- ☐ I checked the nomenclature and entered my own student name and section.
- ☐ I confirmed the due information in Classroom because the source record says “Due: Not shown.”
- ☐ I reviewed the complete work myself before uploading.
- ☐ I opened the exact Classroom assignment and verified its current instructions and submission state.
- ☐ I uploaded the intended PDF and checked the submission state myself.

> This guide does not upload, mark as done, or submit anything.
